

Introducing The Cinderella Treatment by Ultratone

The busy girl's ultimate last minute transformation

If the prospect of trying to slip into your dress for an appearance at the Royal Ball fills you with dread more than excitement and you're worrying that your big entrance might be a little too big, then it's time to call on the services of the Good Fairy Ultratone and allow the magic Bioenergy of Ultratone Futura Pro to save the day and get you the handsome Prince (or Dave from Accounts...!).

Ultratone are the UK leaders in Bioenergy bodyshaping and in just one session of 60 minutes, their Instant Inchloss 'Cinderella Treatment' can deliver rapid centimetre reduction. The rotating waveforms and signals evacuate extra fluid, compress fat and tighten muscles.... and quickly!

Ultratone's Futura Pro system is based on the principle of Bioenergy - a synergy of all the natural beauty technologies combined, to provide maximum results in minimum time. The treatment penetrates the skin via stimulation pads that are placed on the problem areas of your body. The impulses

imitate your body's own natural Bioenergy and emit a series of different waveforms, impulses, amplitudes and frequencies to stimulate, tone and rejuvenate the 'problem' areas. This acute and concentrated targeting means that, even if it's the day before, you can slip (not squeeze) in to that slinky black dress and go to the ball!

There is absolutely no need to kiss a frog, just make an appointment to visit your local Ultratone salon where you will be given concise profiling to ensure you get your fairytale ending!

Fans of the treatment include Madonna, Gwyneth Paltrow and Shakira.
