The Ultratone secret to looking good

It can sometimes be hard to explain the science behind Ultratone, but once you've seen it in action, it all becomes clear. Our bodies use a particular set of biological impulses to renew cells, activate the metabolism, transform fat into energy and keep us fit and healthy. Our present sedentary and stressful modern lifestyle often interrupts this Bioenergy flow and our bodies become unbalanced. Ultratone restores a healthy pattern by simulating these natural signals and bringing back a vital equilibrium to the body specifically in the areas that need it most. Thus a tired face can be refreshed, smoothed and lifted while at the same time body muscles can be exercised, toxins evacuated and fat reduced leading to spectacular centimeter reduction and beautiful body re-shaping.

No more zapping! Moving completely away from the conventional and mostly uncomfortable stimulators, Ultratone offers something totally new, deliciously comfortable and safe to provide maximum results in minimum time. The Ultratone home-kit comes with a wide range of Program cassettes with individual sequenced Biostimulation impulses, specifically tailored to your needs:
